

TOTAL LOGISTICS EXPANDS INTO EUROPE

Leading UK-based supply chain consultants, Total Logistics, have today announced the opening of a new office in the Netherlands. This new development will pave the way for increased activity in Europe.

In line with current growth plans, the establishment of a new office in the Netherlands is an exciting new development which will give Total Logistics local representation for continued expansion into mainland Europe. With a history of major European supply chain projects TL is well placed to help organisations with their supply chain issues. Pan-European clients include Farnell InOne, Flint Ink, Shell Lubricants, Acco and Nestlé.

The new office will be headed up by René Wolters. René joins TL as a consultant with specific responsibility for supporting customers primarily in the Benelux region as well as Germany, Austria, Switzerland and Scandinavia. René has spent 10 years in the logistics industry with Witron, the German logistics solution provider.

Andy Keith, Partner at Total Logistics, commented: "With half of our work outside the UK, the Netherlands office will allow us to improve the support we provide to our customers. We are delighted that René has joined us for the next step in our steady growth plan. We look forward to working with many new and existing European clients on their supply chain issues."
